-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

## DETAILED ACTION

### *Specification*

The disclosure is objected to because of the following informalities: \*\*\*

The specification discloses an impact driven type fastener (which means it is driven with an impact tool such as a hammer) with a plug of filler material joined to the impact surface of the fastener (so that any impact on the fastener with a tool such as a hammer will hit the plug of filler material). There is no disclosure that any of the materials used to make the plug of filler material can withstand substantial impacts (such as those from a hammer) without deformation. In order for this device to work as disclosed, the plug of filler material must follow the head of the fastener into the material being fastened (such as wood) which means that the filler material cannot be deformed. It is obvious that the filler materials disclosed will all suffer deformation (some such as wood putty will be substantially deformed or even dislodged from the fastener surface). Remember, these fasteners must be hit with a tool such as a hammer (usually several times).

Appropriate correction is required (the response should include proof).

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 3677

Claims 1-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. See above objections to the specification.

### **Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references to Lefever, Gilmer, Jr., Sidoti and Rublee disclose related fastener devices and are cited to show the state of the art.

The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
